

STRIP DOOR SOLUTIONS

Practical Features & Benefits

- Install strips in seconds without tools
- Significantly reduce loss of heated or cooled air
- Resist flow of contaminants through doorways
- Engineered mounting system and overlapping strips maintain a tight seal
- Many PVC strip formulations available
- Order strips in rolls for U-trim and save
- Universal, clamp-on mounting also available
- Hinged bi-parting PVC sheet door also available for personnel traffic at walk-in coolers

Reduce Energy Losses In Walk-In Cooler/Freezers, Warehouses and Loading Dock Doorways with RubbAir Strip Door Products

Strip doors add a vital cost-saving barrier against energy losses in heated or cooled sites. Energy savings of up to 75% have been reported on strip doors in some walk-in cooler applications. Our durable, traffic-friendly strip door solutions maintain a cleaner, safer environment by resisting the transfer of dust, odor, contaminants and sound through doorways. And now, RubbAir offers a complete selection of strip formulations in low temp or standard grade PVC from the world's leading manufacturer. Common designs include smooth, clear strips and ribbed strips to take the abrasion from motorized traffic impact without compromising visibility. Other choices include reinforced, anti-static and safety orange strips.

Versatile Bullet-Mount system and U-Trim roll goods offer the ultimate in speed and convenience.

Customer convenience starts with the industry's most versatile strip mounting. Our Bullet-Mount system enables snap-on/snap-off strip replacement 90% faster than conventional mounts, and Bullet-Mount's modular polymer brackets mount under or above the header in minutes. We also offer a proven clamp-type universal strip mounting system in aluminum or galvanized steel hardware. For customers who wish to cut and replace their own strips, we now offer all our PVC strip materials in 150, 305 or 406mm rolls.

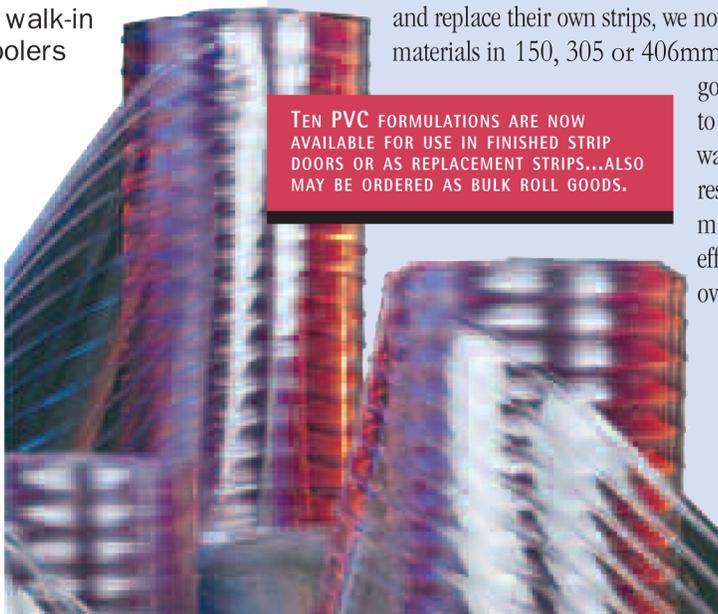

All our rolled PVC roll goods are engineered to hang without warping and to resist cupping, thus maintaining an effective seal between overlapping strips.

TEN PVC FORMULATIONS ARE NOW AVAILABLE FOR USE IN FINISHED STRIP DOORS OR AS REPLACEMENT STRIPS...ALSO MAY BE ORDERED AS BULK ROLL GOODS.

Now with Lifetime Guarantee On Bullet-Mount Hardware

Bullet-Mount system allows fast, easy snap-on/snap-off replacement of strips.

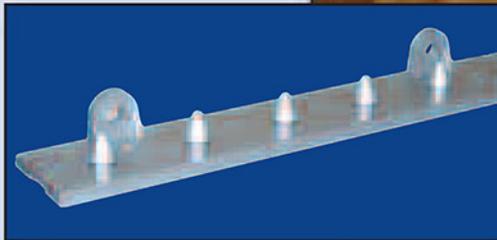

RUBBAIR DOOR Strip door SOLUTIONS

Bullet-Mount strip system makes installation and strip replacement a snap.

RubbaAir's unique Bullet-Mount strip installation system features a modular, snap-together bracket design that is easily sized to your door opening. No tools are required to install or replace PVC strips. Strips are simply snapped into place over the "bullets" by hand...in seconds. The bullets securely retain strips without clamps or further adjustments. The mounting bracket is easily located above or beneath the door header. Reinforced tabs ensure secure, bolt-down installation.

- Available in HTP, stainless or aluminum
- PVC strips snap on in seconds
- Mount under or above header

Bullet-Mount makes strip installation simple without tools or fasteners.

Universal mount available in galvanized steel or aluminum

Universal clamp-on mounting hardware also available

A predrilled universal strip mounting bracket can be bolted under or above the header. Strips are held in place by 305mm faceplates that are clamped tight by three bolts (supplied). Faceplates can be selectively removed to replace damaged strips in minutes.

Cut your own strips and save

For maximum maintenance savings, order strips as bulk roll goods and trim to fit. We offer a strip-kit including a stainless steel template to guide the user in cutting perfect strips and locating mounting holes.

*Snap Strips
In Place
In Seconds!*

Flexible swinging doors provide an energy-saving barrier in cooler/freezers and other retail doorways.

Our Flap-R doors use overlapping, flexible PVC sheets to create an effective primary or secondary barrier against energy losses in busy doorways. These doors feature easy opening action that responds effortlessly to all traffic flow. Choose from two models: our high-visibility, clear PVC model is a great alternative to strip doors in walk-in coolers and freezers; while our colored, pebble finish PVC door provides maximum durability in many applications.

- Self-closing ensures a tight seal
- Flush or in-jamb mount
- Easy bump-open, swing-close action
