

PREDAFLEX™

FLEXIBLE EDGE OPTION FOR PREDADOOR® NXT®

Safety, Flexibility and Performance.

For added peace of mind, the state-of-the-art PredaFlex flexible edge for the PredaDoor eliminates entrapment concerns and provides additional impact protection without sacrificing door performance or quality.

In the event all warning and safety devices stop working, the pliable PredaFlex flexible edge protects pedestrians by flexing around any obstruction and easily releasing from the side columns.

With high speed, a tight seal, a flexible bottom edge and simple break-away system, this door sets the standard for safety and performance. Like the original PredaDoor, all panel sections are quick and easy to replace; minimizing downtime and the expense of replacing an entire panel.

Eliminates Entrapment Concerns - Engineered to flex around any obstruction and easily release from the side column.

Limits Downward Force - Because the PredaFlex is never forced down with zippers, beads or cables, the point of contact and post-impact forces are significantly less than typical “soft” edge doors.

Maintains Uniform Seal - PredaFlex ensures a consistent and uniform seal along the bottom edge.

Lowers Maintenance Costs - Unlike one-piece designs, PredaDoor panel sections are completely replaceable; sliding in and out of the connecting ribs.

Increases Impact Protection - Thick and pliable rubber padding surrounds the entire bottom edge for added impact protection.

PREDAFLEX™

FLEXIBLE EDGE OPTION FOR PREDADOOR® NXT®

PredaFlex™

Door Model

- Rytec® PredaDoor® NXT®

Maximum Size

- Up to 14' W x 14' H

Application Type

- Interior Environments

Panel Type

- Replaceable vinyl sections in orange and blue.

Vision Options

- Replaceable clear PVC sections.

PredaFlex flexes to conform and curve around any obstruction

Edge flexes around objects

Flexible and Resilient

- Vertically flexible to accommodate any obstruction.
- Horizontally firm for added stability and uniform seal.
- Enables 'soft' response from bottom and firm response from front or back.

Takes a Hit™ and Resets

- Breaks-away after accidental impact.
- NXT Quick-Set™ repair system.

Resetting doors after accidental impact

Pliable and Tight Sealing

- Rubber padding provides cushioning and absorbs energy.
- Exclusive design provides consistent shape to seal from edge to edge.

Tight seal and clean appearance

PredaDoor shown with optional PredaFlex and optional aluminum hood

Trouble-Free Design

- No attached cables, zippers or coil cords to repair or replace.
- Proven PredaDoor performance.

System 4 shown with optional rotary disconnect

Electrical Controls

- System 4™ controller housed in a NEMA 4X rated enclosure with factory set parameters.
- Intelligent processor monitors and controls power consumption.
- Advanced self-diagnostics for troubleshooting.
